

Costa Oil Train Guide

Date Completed: _____

Technician: _____

Trainer: _____

- 🔥 Ensure the trainee has read the Top-side Procedure
- 🔥 Show the trainee the top-side layout including:
 - 🔥 Where tools are kept
 - 🔥 Location of PPE
- 🔥 Familiarize the trainee with the location of equipment and fluids and best practices for handling these items. For example:
 - 🔥 Don't swing the air chuck.
 - 🔥 When moving this machine, push/ pull it this way.
- 🔥 Demonstrate and practice clear hand signals.
Explain why clear hand signals are so important for safety.
- 🔥 Explain the purpose of the yellow safety lines, the blue line (if applicable) and where to stand while guiding a vehicle in on each bay (some bays may be different due to podiums, doors, etc).
- 🔥 Explain the difference between a regular valve stem and a TPMS valve stem. Never force a valve cap off a TPMS stem. «, -l
- 🔥 Explain when/how to properly use a 'Double-check.'
 - 🔥 Explain the importance and responsibility in doing seconds correctly to ensure safety, quality of

service, prevent service failures, customer retention, and speed

- 🔥 Show respect
- 🔥 Break large processes into smaller chunks
- 🔥 Be patient and flexible
- 🔥 Listen
- 🔥 Set clear expectations
- 🔥 Ask questions to measure comprehension
- 🔥 NEVER teach a shortcut
- 🔥 Give positive feedback

Fluids

- 🔥 Demonstrate the proper way to use a coolant hydrometer if the guest requests a temperate reading.
- 🔥 Explain where fluids will be located on almost all vehicles.
 - 🔥 Brake fluid in front of driver
 - 🔥 Power steering toward the front of the engine near drive b.
 - 🔥 Washer fluid rear the passenger or driver's side fenders
 - 🔥 Coolant in the front of the vehicle (the reservoir may be located near the fenders or near the washer fluid) to unlock them correctly.
- 🔥 Demonstrate how to properly remove sensors and hoses from I r filter boxes and explain the importance of installing these parts correctly after the service.
- 🔥 Have the trainee practice using the battery tester on old core batteries so they understand how the menus are arranged.
- 🔥 Demonstrate the SIX-FINGER method for removing coolant cap,
- 🔥 A best practice is to have the trainee demonstrate the procedure I on a vehicle that as cooled down, like their own vehicle.
- 🔥 Demonstrate how to recognize an oil pressure gauge and oil light.

- 💧 A best practice is to allow the oil light or gauge to read pressure for 3 seconds before calling out oil pressure.
- 💧 Demonstrate where to find the reset procedure for the oil light
- 💧 Explain why the ipstick should not be held inside the guest's window area when verifying the oil level.

Multiple Vehicles

- 💧 Demonstrate the acceptable points to begin work on a second vehicle.
- 💧 Explain the importance of helping the bottom-side technician
- 💧 Explain the importance of ensuring the first vehicle in leaves first
